

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Original) A barrier coating composition characterized in that it comprises a polymeric material and at least one inorganic flake material.
2. (Original) A barrier coating composition as claimed in claim 1, characterized in that the polymeric material is present in an amount of 50 to 99 % by weight.
3. (Currently Amended) A barrier coating composition as claimed in claim 1 or 2, characterized in that the inorganic flake material is present in an amount of 1 to 50 % by weight.
4. (Currently Amended) A barrier coating composition as claimed in ~~at least one of the preceding claims~~ Claim 1, characterized in that the particle thickness of the inorganic flake material is preferably less than 1.0 μm .
5. (Currently Amended) A barrier coating composition as claimed in ~~at least one of the preceding claims~~ Claim 1, characterized in that the average particle size of the inorganic flake material is in the range of 1 to 1000 μm .
6. (Currently Amended) A barrier coating composition as claimed in ~~at least one of the preceding claims~~ Claim 1, characterized in that the inorganic flake material are glass flakes.
7. (Currently Amended) The use of a barrier coating composition as claimed in ~~at least one of the preceding claims~~ Claim 1 in a barrier coating layer of Organic Field effect transistors, Liquid crystal displays, OLED displays, flexible displays, displays of TV screens, photovoltaic cells and lithium batteries.
8. (Currently Amended) A device comprising at least one barrier coating layer, characterized in that the at least one barrier coating layer comprises a barrier coating composition as claimed in ~~at least one of claims 1 to 6~~ Claim 1.

9. (Currently Amended) A display comprising at least one barrier coating layer, characterized in that the at least one barrier coating layer comprises a barrier coating composition as claimed in ~~at least one of claims 1 to 6~~ Claim 1.
10. (Original) A barrier coating formulation comprising
 - a) a polymeric material and/or a polymerizable material,
 - b) at least one inorganic flake material and
 - c) at least one organic solvent.
